

AMHA SHIFERAW

Raleigh, NC • 919-561-1488 • amhashiferaw@gmail.com • [linkedin.com/in/shiferawa](https://www.linkedin.com/in/shiferawa)

Cloud DevOps Engineer

Dynamic and results-driven Cloud/DevOps Engineer with experience implementing scalable, secure, and cost optimized cloud infrastructures, specializing in Data on AWS, Azure, and Google Cloud Platform. Proficient in IaC tools like Terraform and Cloudformation. Proficient in SQL and proprietary data automation tools such as BTEQ. Eager to join a forward-thinking team where I can contribute to high impact projects and foster cloud data excellence.

WORK EXPERIENCE

- **Colba** 12/2019 - Present

Cloud Operations/DevOps Engineer

Raleigh, North Carolina (Hybrid)

- Proactively monitored CloudWatch metrics and VPC Flow Logs to identify and resolve critical errors
- Designed and deployed scalable cloud infrastructure using AWS services for mission-critical applications
- Achieved 12% reduction in operational costs through strategic resource management over a quarter
- Automated deployment processes with Terraform and CloudFormation, accelerating timelines by 30% annually
- Leveraged AWS CLI for efficient scripting and automation of complex infrastructure tasks Systems Integration Specialist Raleigh, North Carolina
- Managed and optimized systems across Linux, macOS, and Windows environments
- Architected PCI DSS-compliant network solutions, driving 17% annual revenue increase
- Automated audit processes with bash scripting, improving efficiency and compliance
- Delivered minimum 11% revenue increase per account through strategic solutions over the term of the projects.

PROJECTS

Personal Professional Portfolio – <https://itsamha.com>

Technologies: AWS (Terraform, S3, CloudFront, Route 53, Cognito, VPC, Lambda, API Gateway); HTML/CSS/JavaScript

Developed and deployed a dynamic personal portfolio website (itsamha.com) to showcase skills in scripting, Terraform, and cost management using AWS. Engineered a secure, scalable infrastructure using Terraform for IaC provisioning, S3 with CloudFront for global CDN-hosted static assets, Route 53 for DNS and SSL management, VPC for isolated networking, and Lambda/API Gateway for serverless backend APIs—ensuring 99.9% uptime and seamless performance. The site features interactive sections for professional highlights, project showcases, and contact forms, serving as a live proof-of-concept for designing cost-effective, high-availability solutions that bridge technical precision with user-centric design. This project underscores my ability to architect resilient cloud environments while fostering professional networking and personal branding.

Fireferral – Referral Tracking Web Application

Technologies: Google Cloud Platform (Firebase, Firestore, Cloud Functions, Firebase Hosting), Node.js, React, HTML/CSS/JavaScript

Designed and deployed Fireferral, a referral tracking web application hosted at <https://fireferral.web.app>, to streamline professional networking by enabling users to manage, track, and analyze referral campaigns with real-time analytics. Architected a fully serverless infrastructure on Google Cloud Platform, utilizing Firebase Hosting for the React-based frontend, Firestore for scalable NoSQL data storage, and Cloud Functions for serverless API logic. Achieved 99.99% availability and reduced latency by 25% through optimized Firestore indexing and efficient caching strategies. Implemented secure user authentication via Firebase Authentication, ensuring data privacy and compliance. The application features a responsive UI with interactive dashboards for referral tracking, analytics visualizations, and seamless API integrations, showcasing expertise in building user-focused, cloud-native solutions. Fireferral demonstrates my ability to deliver high-performance, cost-optimized systems using GCP's Firebase ecosystem while enhancing user engagement and operational efficiency.

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

Hashicorp Terraform Associate

Academy Accreditation – Databricks Fundamentals

AWS Certified Cloud Practitioner

Microsoft Certified Azure Fundamentals

Teradata Vantage Database Administrator

SKILLS

AWS Services: CloudFront, CloudWatch, DynamoDB, EC2, IAM, Lambda, RDS, Route 53, S3, VPC

Infrastructure as Code: Ansible, AWS CDK, AWS CloudFormation, Terraform

Containers & Orchestration: Amazon ECS, Amazon EKS, AWS Fargate, Kubernetes, Docker

Monitoring & Logging: AWS X-Ray, CloudWatch Metrics & Logs

Security & Compliance: AWS IAM, AWS KMS, AWS Secrets Manager, AWS WAF, PCI DSS Compliance

Networking: DNS Management, Load Balancers, NAT Gateways, Subnets, VPC Design, NGINX **Programming & Scripting:** AWS CLI, Bash, JSON, Proxmox CLI, Python, YAML

Database: SQL, Postgres, Teradata Vantage, BTEQ, AWS RDS, DynamoDB, Azure Cosmos DB
